

VP Delta 2 Cut-Sheet Fed Braille Embosser with NEW Power-Dot Braille

Get fast, reliable braille with the VP Delta 2! Embossing at 120 CPS, this double-sided embosser gives you Library of Congress standard braille with the highest-resolution tactile graphics. And for those wishing for an extremely strong braille dot, the NEW Power-Dot Braille is now available!

New "Power-Dot Braille"

Aiming for the ultimate in braille quality, ViewPlus collaborated with Braillo to create a braille dot on a desktop embosser like the braille dot made by a Braillo production embosser. The result of that collaboration is Power-Dot Braille. Power-Dot Braille makes the strongest, most tactile braille dots available from any desktop braille embosser but still maintains a pleasing rounded dot shape. For the first time, it is possible to have production-quality braille on a desktop embosser!

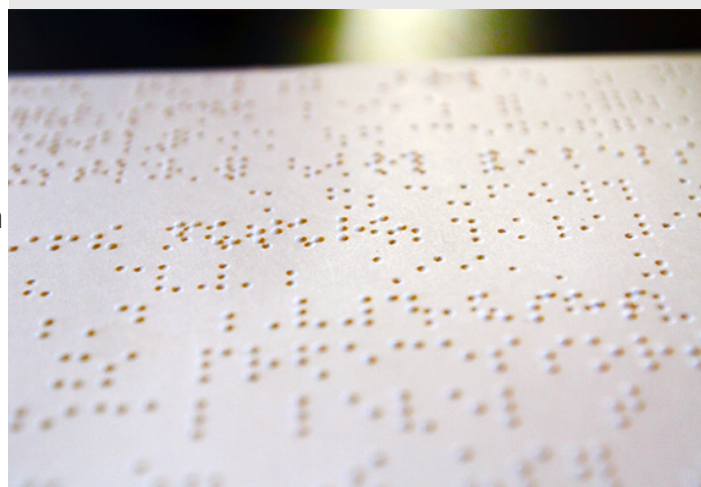

Variety of Media Types

The VP Delta 2 also offers the widest variety of media possible. Utilizing a unique individual sheet feeder, users can emboss documents on standard braille paper as well as use mainstream media to create braille labels, doublesided braille business cards and more! Even use 11x17 paper to make foldable braille books, instantly.

About the VP Delta 2

Price: \$4,195.00

- 120 characters/second double-sided braille embosser
- NEW Power-Dot Braille - the strongest, most readable braille dots available on desktop embosser
- High-resolution tactile graphics - 8 dot heights for greater detail
- Individual cut-sheet paper - for the widest selection of media!
- Emboss documents, business cards, braille labels and more!
- Includes Tiger Software Suite - braille and tactile graphics software
- Worry-free maintenance and local US service center

High-Resolution Tactile Graphics

The VP Delta 2 offers the highest-resolution tactile graphics available on an embosser. With 8 different dot heights, users can create distinct tactile graphics more easily than other embossers. Even if images have intersecting lines, like graphs, readers can easily distinguish lines and grids, which can be embossed to different heights.

Braille & Tactile Graphics Software Included

Tiger Software Suite (TSS), is your complete solution for producing braille and tactile graphics. TSS makes it easy to get accurate braille translation in seconds. Insert text and graphics within familiar programs such as Word and Excel and translate with the touch of a button. TSS is great for users of all skill levels!
