Place the i-See on a flat, stable surface. Plug the power cord into the back of the i-See, then plug the other end into a power outlet. There is a white lever located directly behind the monitor on the right-hand side that allows you to adjust the monitor height. Pull the lever toward you to slide the monitor up or down until you reach a comfortable height.

**Power On/Off:** The power switch is located on the bottom right-hand side of the pillar. Flip the power switch toward you to power the unit on and away from you to power off.

**Zoom In/Out:** Turn the knob clockwise to increase magnification and counter-clockwise to decrease magnification.

**Change Contrast:** Push the knob to switch between photograph mode or reading mode. The mode you used last will then automatically be selected. Turn the knob to select the different display modes.

**To Adjust Brightness:** Hold and turn the brightness knob clockwise to increase brightness and counter-clockwise to decrease brightness.
Moving the Reading Table: You can restrict the movement of the reading table using the lever at the front of the table.

- To lock the table, move the lever all the way to the left.
- To allow the table to move left and right, but not up or down, move the lever to the middle position.
- To allow the table to move freely, move the lever all the way to the right.
